Dear Gentlepersons,

Pursuant to Board Order No. R6T-2019-0240, which renews Order R6T-2014-0030, please accept this letter as required written notice of an herbicide application related to the projects authorized under the Cal-Fire environmental compliance documents referenced above.

Herbicide for a site preparation related to reforestation is planned to occur this season. This will be a broadcast application by hand crews equipped with backpack sprayers and by helicopter. For this application, I anticipate using a mix of Polaris SP, Roundup Pro Conc., MSO, Blue Dye, and Velpar DF. A buffer of at least 15 feet shall be applied to all watercourses and springs, within which no treatment will occur.

Please contact me if you have any questions or concerns regarding this notice. I thank you in advance for your time and look forward to working with you going forward.

Sincerely,

W. M. BEATY & ASSOCIATES, INC.
